

DÙCTILE

ALL PURPOSE CLEANER

DESCRIPTION

Product suitable for cars that are particularly dirty or that has to be reconditioned. DÙCTILE is a versatile and extremely concentrated detergent with strong cleaning action. It can be effectively used on all types of surface, both for interior and exterior parts of the car. The product has been certified by Alcantara® for the removal of stubborn stains like those of drinks or organic residue that are hard to remove, without discolouring the fabric. Its innovative cationic surfactants leave the fabric soft and pleasant to the touch, which is unusual for an APC. To delicately and deeply clean the plastics and for a brand new like finish, DÙCTILE can be used either with a brush, to create a foam that can be easily worked and removed with a simple dry microfibre cloth, or with extraction or steam machines. Thanks to its "Odor Block" technology, it neutralises unwanted and bad odors in the interior of your car, such as the smell of normal and electronic cigarettes, leaving a long-lasting clean and fresh scent. Due to the versatility of its formula, it can also be safely and effectively used on all kind of fabrics, even the most delicate ones, in order to eliminate stubborn stains like those of oil and grease.

DILUTIONS

For exterior cleaning of the car we suggest the following DILUTIONS: engine, alloy wheels and wheel arches 1:3, door sill and prewashing 1:20-1:30 (depending on the dirt). For the interior cleaning we suggest the following DILUTIONS: fabric and moquette 1:10, plastics 1:20. Its formula does not leave any residue and is easy to rinse.
