GLAZE SEALANT & PRIMER GLOSS BOOSTER FOR CUPIDO™

DESCRIPTION

DEEP SHINE - SILKY EFFECT FOR PREPARING SURFACES

RECOMMENDED PADS

microfiberpad

black pad

► Glaze & Primer VÉNERE serves a dual function: it is a finishing polish that enhances the finish and significantly improves the gloss, but is also a primer to be applied before CUPIDO to enhance the performance of the sealant.

► Ultra-fine abrasives, sophisticated resins and a grip enhancer improve the gloss, enhancing the depth of dark colours, highlighting the mirror-like effects of metallic and pearly colours, and giving a pleasant silky feel.

► VÉNERE is quick and easy to use and can be applied manually or using a polishing machine. Extremely concentrated and easy to remove, VÉNERE creates deep brilliance and a mirror-like effect, also covering small scratches and leaving no residues on rubber or plastic parts.

INSTRUCTIONS FOR USE

BY HAND: just two small drops of VÉNERE are required to effectively treat a single panel. Remove with a clean microfiber cloth.

WITH ORBITAL POLISHER: apply the product on a pad and spread it at speed 1-3 using an orbital polisher. VÉNERE can also be applied with an orbital polisher, and not removed. Simply spray #CUPIDO on and remove all with one single solution to complete the polishing and sealing work.

SPEED

Rotorbital:

Spread the product: speed 1
Complete cut: speed 3
