NEUTRAL DETAILING SNOW FOAM PRE-WASH SHAMPOO

DESCRIZIONE

- ▶ #NÈVE is a prodigy of chemistry: a neutral foam shampoo with power comparable to an alkaline one!
- ▶ #NÈVE is a concentrate of highly biodegradable surfactants without any phosphates, formulated in such a way as to adhere on the surface for a long time, cleansing it thoroughly, softening dirt and road contamination of any kind.
- ▶ #NÈVE is safe on any surface, even the most delicate trims and metal mouldings.
- ▶ Thanks to the significant presence in its formula of chelating agents of calcium carbonates, #NÈVE is able to maintain high performance even in hard water, decreasing the risk of leaving residues in the drying stage.
- ▶ #NÈVE is safe on applied protection, be it wax, sealants or nanotechnological coatings.
- ▶ The refined composition of #NÈVE, makes this shampoo safe even if used in sunlight.

INSTRUCTIONS FOR USE

#NÈVE is a prodigy of chemistry: a neutral foam shampoo with power comparable to an alkaline one! Never before had a neutral pH shampoo been so effective on dirt. #NÈVE is a concentrate of highly biodegradable surfactants without any phosphates, formulated in such a way as to adhere on the surface for a long time, cleansing it thoroughly, removing dirt and road contamination of any kind. #NÈVE is safe on any surface, even the most delicate trims and metal mouldings.

Thanks to the significant presence in its formula of chelating agents of calcium carbonates, #NÈVE is able to maintain high performance even in hard water, decreasing the risk of leaving residues in the drying stage. #NÈVE is safe on applied protection, be it wax, sealants or nanotechnological coatings.

The refined composition of #NÈVE, makes this shampoo safe even if used in sunlight. #NÈVE, just like all #Labocosmetica® products, is also developed, formulated and produced in Italy.
