

#SÀTINO

SHAMPOO AND WAX FOR MATT OR WRAPPED CARS

VDA certification

DESCRIPTION

- ▶ Shampoo with excellent cleaning properties, ideal for matt or wrapped paints.
- ▶ Assures effective bodywork protection against UV rays for at least 2 weeks.
- ▶ Self-drying product, it makes the subsequent drying phase much easier.
- ▶ With a highly lubricating action, it is completely safe on the waxes applied.
- ▶ It does not affect bodywork silkiness, wholly respecting the matt finish.
- ▶ Thanks to easy rinse-ability, it prevents the formation of stripes and halos in the drying stage.
- ▶ Its chelating agents, used to remove from the water the calcium and magnesium particles that interfere on the yield of the product, leaving the surfactants free to operate at their best, from the water make it indispensable also on normal paints in the presence of hard water, for normal maintenance wash.
- ▶ Thoroughly researched, developed and tested by MaFra laboratories in cooperation with the most prestigious sports car makers worldwide.

INSTRUCTIONS FOR USE

#SÀTINO is extremely concentrated and particularly effective already in 1:60 dilution. Wash the vehicle using a microfibre glove, then rinse with cold water and dry with a microfiber cloth. All references of the #Labocosmetica® line benefit from the extensive experience gained by Ma-Fra® within ISO 14001 certification: its guidelines, in fact, entail progressive reduction of the products' environmental impact and water consumption.

Use #SATINO according to the favourite dilution, with around 5lt of water in the #COMODO bucket and then, with a microfiber glove, start to wash the car with the 2 buckets technique. Start the washing phase from top to bottom, frequently rinsing the glove for taking off possible debris. Make linear movements with no pressure on the surface, so to avoid more defects.
